Stop the Spike

Campaign Overview

The **Stop the Spike Campaign with supporting pillars** has launched in recognition of the rising numbers in Covid cases. The campaign aims to remind the public of the key safety measures they should continue doing to keep themselves and others safe.

Key Messages

The campaign advises the public to:

- Keep mixing with others to a minimum
- Try to meet people outdoors wherever possible
- Try to keep a distance from others
- Continue to wear face coverings when required
- Continue to test regularly

Safety Measures

Campaign Overview

The **Safety Measures** campaign aims to encourage people to continue following safety behaviours, including opening windows and doors when meeting indoors and highlighting how outdoor socialising is safest.

Even if people are vaccinated, it's important that people continue to follow the safety measures, to help stop the spike in cases.

Key Messages

- Ventilation when socialising indoors
- Outdoor socialising where possible
- Cleaning hands
- Wearing face coverings
- Transport safety measures

Social Assets

Safety Measures

Posters

Five posters (in A4 and A3 formats) cover each of the key safety behaviours and the transport execution.

[Safety Measures posters in A4/ A3 can be downloaded here.](#)

When meeting indoors, open a window and let fresh air in.

Meet up outside and keep numbers down.

Keep cleaning your hands regularly.

Remember face coverings are required in most indoor public places.*

Let's make safer choices when we travel.

- Use face coverings
- Clean hands often
- Use contactless where possible
- Plan ahead

Let's stop the spike.

Asymptomatic Universal Testing

Campaign Overview

The new campaign 'Wee Reminder' looks to help engrain twice weekly asymptomatic universal testing as a habit for people in Scotland. As cases are currently high, it's important that everyone tests regularly to help find the virus and stop the spread.

Key Messages

- It's important to take your two Covid tests every week, even when vaccinated.
- Around 1 in 3 people with COVID-19 don't show any symptoms.
- Testing regularly helps find the virus, stopping it before it spreads.
- Test kits can be collected from community pharmacies and local test sites, or ordered online at nhsinform.scot/testing.
- Recording both positive and negative results allows us to track the presence of the virus in our communities. Cases are high in Scotland. Let's stop the spike.

Facebook

- It's more important than ever to take your two free Covid tests every week and record your results.

Instagram

- Covid cases are high in Scotland. So it's more important than ever to take your two free Covid tests every week and record your results.

Twitter

- Covid cases are high in Scotland. So it's more important than ever to take your two Covid tests every week and record your results, even when vaccinated. Testing regularly helps find the virus, stopping it before it spreads. For your free test kits go to **nhsinform.scot/testing**

Symptomatic Testing & Isolation

Key Messages

- Even if we're vaccinated, we can still get coronavirus and pass it on to others.
- It's vital that even if we only have mild symptoms or asked to by the NHS, we self-isolate immediately and book a test.
- For financial and practical support, contact the National Assistance Helpline on 0800 111 4000.
- Cases are high in Scotland. Let's stop the spike.

COVID-19 Vaccine

Campaign Overview

Everyone aged 18 or over in Scotland should now have received an invite for their first COVID-19 vaccination appointment.

However, many have still to come forward for their vaccine. It's really important that all those eligible come forward as soon as possible and get both doses of the vaccine to ensure maximum protection from COVID-19.

Please help us encourage people to take up the vaccine by sharing the campaign posters across your channels.
