

A Public Lecture: "Wave energy: making best use of a variable resource"

**Prof. Denis Mollison
(of Heriot Watt University)**

**2.45pm Wed 1st December,
The Lecture Theatre,
The Green House,
Beechwood Business Park,
Inverness**

The Royal Statistical Society and UHI HI Links invite you to a lecture given by Prof Mollison who first became involved in wave energy in the 1970's through working with Stephen Salter. He will present his work on the problems and solutions to describing, predicting (and ultimately harvesting) the availability of wave energy around the UK coastline.

UHI HI Links is a free service helping companies in the Highlands and Islands to develop business ideas in collaboration with Scotland's academic experts. There will be tea & coffee from 2.45 – 3.30 and so a brief opportunity for businesses to chat with Prof. Mollison with a view to potential collaboration. There is no charge for this lecture but we would appreciate notes of intended attendance. Please e-mail roger.humphry@sac.ac.uk
